### Our People

**Bobby Vanichkitrungruang- Assistant Electrical Engineer**

### What do you enjoy most about living in the region?

I enjoy working with the down to earth people out here. I particularly enjoy the great scenery during the day and the awesome night skies. I came from the city where it is usually too bright to enjoy the simplest beauty of the night skies. In my view, the mid-west is sometimes rough and rugged (-7 degree mornings with no water) but when you view it closely, it's truly beautiful and captivating.

### What do you do in your leisure time?

I race Go Karts on the weekends. In summer I enjoy swimming after work. I'm new to the area and love to meet new people, so I'm looking forward to exploring the region, trying new restaurants, and finding new events to attend. I like to cook, but only really get time to do it on special occasions.

### Which book / or movie are you looking forward to reading / seeing?

I enjoy reading the Horatio Hornblower series adventures by C S Forester. I like how the story starts through his humble beginnings and progresses as he is challenged with new missions to further his career, but more importantly who he is as a person. I can relate to his character and his qualities I admire.

## Fun day for families in Rylstone

The Rylstone showground was abuzz with the Rylstone/Kandos Family Fun Day kicking off for its second year.

"It was wonderful to see so many children and their parents enjoying the day,"

"There was so many activities for the kids and parents alike and it is a fantastic way to show the community what's on offer in our local area," said Kylie Fuller, Charbon's Commercial Service Officer.

With close to 800 people attending the event, the Family Fun Day included stalls from local businesses and services as well as an array of entertainment and activities organised by the Local Rural Fire Service, as well as a rugby league skills session to encourage activity and promote healthy lifestyles.

The Family Fun Day is aimed to provide local businesses and services the opportunity to meet community members and provide information regarding family health and how to access the relevant services.

"The event was a great success with nearly double the community involvement than previous years. The kids had a ball learning and participating in the activities," said Event Organiser Marian Mirie.

This year Centennial Coal supported the Fun Day's entertainment which included the local band "Blind Date" and a jumping castle.

## Airly Community Information Sessions to start in November

Centennial's Airly Mine will be holding a series of Community Information Sessions in November to provide community members an update on the Airly Extension Project.

If approved, the extension project will allow Airly to continue its underground mining operations and the upgrade of its existing surface infrastructure. The upgrade will improve Airly's underground ventilation system and services, support buildings, electrical infrastructure, communications and other services.

"The Community Information Sessions provide us a great opportunity to meet with interested community members and answer any questions they may have regarding the extension project,"

"We'll have a series of project plans, information flyers and the latest community newsletters to give the community

an in-depth look into the future of Airly," said Centennial's Greg Brown.

### The Community Information Sessions will be held on:

- Saturday 3rd November (9am – 1pm) at the Capertee Hall, Capertee
- Saturday 10th November (9am – 1pm) at the Glen Alice Hall, Glen Alice
- Saturday 17th November (9am – 1pm) at the Wallerawang CWA Hall, Wallerawang

Please call into to any Information Session at the time which is convenient to you.
